

SUFEX hosts the 6th Environmental Summer School

On July 9-15, 2018 the Volga Tech based Jean Monnet Centre of Excellence – SUFEX organized the 6th Russian-Chinese Youth Environmental Summer School “Monitoring of Environment under Climate Change: Methods and Technologies”. The program was designed by team of Jean Monnet Center of Excellence and featured indoor and outdoor learning activities including workshops and training sessions, as well as cultural tours. This year the Summer School united 25 students, of whom 10 people came from Volga Tech partner institutions from People’s Republic of China: Fujian Normal University (Fuzhou) and Yunnan Normal University (Kunming). Summer School students with their academic background in Environmental Sciences, Earth Sciences, Geography and Geomatics have gained invaluable international experience by studying contemporary trends in use of geoinformation systems and technologies in European and Russian forestry and modern approaches towards climate change by the EU researchers/ They also had a unique opportunity to learn and feel cultural diversity of the language and peoples residing in the Middle Volga Region of Russia. Chinese students noted high level of organization of the program and hospitality of people of Yoshkar-Ola.

Volga Tech Summer School is one of the longest and most successful projects of international youth mobility implemented in Republic of Mari El.
