

Scientific publication

Centre of Sustainable Forest Management and Remote Sensing of PGTU accepts materials for free publication in the annual international collection of scientific articles “Forest ecosystems under climate change: biological productivity and remote monitoring” until October 15.

The authors of articles can be teachers, post-graduate students, doctoral students, students, as well as scientific and practical workers.

ISBN, UDC and BBK codes are assigned to each publication, and publication will be registered in the Russian Book Chamber and in RSCI database. The most interesting works will be registered in the international database AGRIS, which is equivalent to the publication status in publications of the Higher Attestation Commission.

Information and requirements for design of materials are at [our website](#).
